With over 5 years of development experience, I approach challenges with a professional attitude, dedication, and a focus on providing

optimal long-term solutions. Exposure to diverse technologies has honed my ability to think creatively and find effective solutions.

As a hard-working and goal-oriented individual, I am continuously seeking new challenges to fuel my career growth. Currently, I serve as an Automation Engineer, leveraging Python, TypeScript, and JavaScript to automate processes. I take pride in my ability to adapt to different project stages and contribute to the team's success.

If you're looking for a results-driven professional who can drive efficiency and deliver exceptional software solutions, let's connect and explore opportunities to collaborate.

---

## Experience

### EPAM Systems

Senior Software Test Engineer

February 2023 - Present (2 years)

Poland

### Arbisoft

Lead SQA Automation Engineer

July 2019 - January 2023 (3 years 7 months)

Lahore, Pakistan

In my role as an SQA Automation Engineer, I not only automate test cases, but also strive to deliver software solutions of the highest quality. I take an active part in team interactions and client communications, while also taking charge of implementing client-specified features through Jira tickets.

My experience working within Agile teams has honed my skills in both Scrum and Kanban methodologies. I adapt these methodologies according to the current stage of the project, ensuring optimal efficiency and productivity. This seamless integration into the development cycle allows me to aid in the delivery of software solutions that consistently exceed client expectations.

My professional approach is underpinned by a commitment to continuous improvement, effective communication, and adherence to Agile practices. This dedication propels the success of every project I undertake. If your team would benefit from the addition of a passionate, collaborative, and results-oriented

SQA Automation Engineer, I would welcome the opportunity to discuss how I can contribute to your team's success.
